ARTE E SCIENZA IN PIAZZA 2012

Art and science expo

Various locations

Bologna (BO)

Annual event dedicated to the spread of scientific culture and organized by Fondazione Marino Golinelli.

Over 100 events including exhibitions, performances, meetings about the scientific landscape and cultural heritage, film screenings, concerts, games and creative workshops in the space between art and science. The historic center of Bologna (Palazzo Re Enzo, Sala Borsa, Piazza Nettuno, START) for 11 days will turn into the Art + Science Center and will involve the public of all ages.

The 2012 edition will be an exhibition of contemporary art and science "Da ZERO a CENTO, le nuove età della vita", curated by Giovanni Carrada and Cristiana Perrella. Among the works, some of which were made specifically for the exhibition, there is a series of scientific exhibits that show how and why our lives are changed. Many meetings and conferences will be held, from the Dialogues of Art and Science, in-depth meetings on the relationship between art and science with important cultural and scientific views of the guests.

For the cycle Agora University researchers will present ideas to the public and border projects. The program also includes four conversations in the planetarium on astronomical events that affect the birth, evolution and the end of life.

And for kids: START Lab Creative Cultures. The space will house the Children's Center of Art and Science on the Square that will feature activities aimed at children and adolescents aged 2 to 13 years.

Date: dal 02/02/2012 al 12/02/2012

Event timetable: Further information and programme soon available on the event website.
